Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments filed November 10, 2003 have been fully considered but they are not persuasive for the reasons set forth below.

The declaration under 37 CFR 1.132 filed November 10, 2003 is insufficient to overcome the rejection of claims 1-30 and 38 based upon 35 USC 102 and 103 as set forth in the last Office action for the reasons set forth below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19, 22-28 and 38 are rejected under 35 U.S.C. 102(a) or (e) as being anticipated by Van Blitterswijk et al. (U.S. Patent 6,152,964) for the reasons of record.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1651

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 and 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Blitterswijk et al. for the reasons of record.

Claims 10-16, 20-22, 25 and 29-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Blitterswijk et al. in view of Long et al. for the reasons of record.

The submitted declarations by Michael Long and Julie Glowacki are acknowledged. The declarations assert that the nodules of the prior art are not the same as the spheroids of the claims. However, the claims fail to define the spheroids of the claims in any manner as discussed in the declarations, i.e. the characteristics addressed in the declarations that are used as evidence of the difference between the two structures are not present in the claims. Broadest reasonable interpretation of the terms in the claims allow the nodules of the prior art to fall within the scope of the claims, particularly since broadest reasonable interpretation of the phrase "osteogenic cell or bone precursor cell" does not limit the cell type to any particular phenotype other than a cell that could ultimately differentiate into a cell that produces bone matrix.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

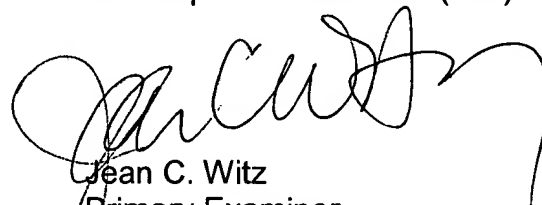

Art Unit: 1651

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
